Thank you for providing this information in a timely manner. There is an outside chance that CDM may have a person at the dock on Friday to document initial activities. If a CDM person (or even myself) decide to stop by at the docks on Friday, I'll let you know via email or call by COB Thursday.

Subject: RM 10.9 Pre Dredge Bathymetry Survey

Mike,

As requested during our 7/9 phone call to keep EPA informed on calibration and QC procedures regarding the upcoming bathymetry survey, attached is the calibration and QC procedure that will be used by GLDD. We will follow-up with the final bathymetry report that will include calibration records when it is available. Please contact Bill Potter or me if you have any questions.
